

Ecolux™ Low-E

Solar Gard's most advanced product provides year-round comfort improvement by keeping the sun's heat out in the Summer and keeping heat inside in the Winter.

Key Benefits

- Low emissivity prevents heat from escaping through windows in the Winter
- Spectral selectivity lets in 68% of natural light while keeping out 52% of the sun's energy
- Money and energy savings year-round on cooling and heating
- UV blockers protect people and property from damaging UV rays
